PROVENSECURE™

Project Status Summary

Risk Mitigation Metric for Multifactor Authentication Systems (DARPA RA-11-52)

Report Date: 22-Sep-2013
Project Manager: Bob O'Brien
Technical Lead: Stephen Paul King

Project Schedule
Overall Project is **Behind Schedule**.

- Sprint 5 is complete.
- Sprint 6 begins on Monday, 9/13/13.
- Test Session Acquisition will restart on Monday, 9/23/13.

Project Budget
Project is on budget:

- An invoice for license purchase of software to extend cameras and microphones to the VM was submitted on 16-Sep-2013.
- Invoice for lease of AWS Virtual Machine environment will be forwarded as soon as we get one from the vendor.

Risks and Issues
Risks and Issues were last reviewed by the Project Team on 08-Sep-2013.

Adom Giffin has started classes; we are managing the schedule adequately thus far.

API issues with Betaface have been resovled.
AT&T Face is being abandoned. The API is proving to be "unstable" due to that product's "pre-beta" nature.

Overall Project Health

Project is healthy. While test data collection is started late, there was a small "cushion" built into this portion of the project. We still anticipate completion of project on time.

Additional Comments

Project Plan has been modified to include an additional coding sprint. This sprint will wrap up the Batch processing and the simulated login capabilities.
