Issue ID	Disruption Potential	Issue Score	Last Reviewed	Issue Status	Issue Short Name	Issue Description	Mitigation Strategy
I2	Significant	25	25-Aug-13	Open / Active	Logitech Cameras and Microphones do not "cross over" to remote server system	The Bendh running on our AWS test system cannot "see" Logitech cameras on remote workstations -- and most PSS people are using Logitech cameras. (Only "true plug and play" devices bridge.)	We are looking at a product from FabulaTech that will bridge any camera. Need only to decide on purchase option details.
I3	Medium	9	25-Aug	Open / Active	Issues with web scripts on ProvenSecure's SMS Demo	We intended to use the existing SMS demo available on the ProvenSecure website for the SMS test in the Bench. There appear to be issues with the web server script.	Correct the script
I1	*Minimal*	*1*	*28-Jul-13*	*Closed / Resolved*	*Development team geography*	*Development Team distribution across multiple time zones makes communication planning difficult*	*Commuication Plan is being developed that will allow for "disconnected" standup meetings as required where significant timezone differences exist. (Project Manager will facilitate and ensure all team members are up to date about all issues.*
